Product Name : News Rank
Team Name : Royalty Inc.
Release Name : Version 0.9
Release Date : April 28th 2017
Revision Name : Version 1.0
Revision Date : May 15 2017

High Level Goals:
- Functional website that can aggregate various data from social media to perform sentiment analysis.
- Implement Key word search
- Create some sort of feedback system for user experience
- Implement Google Analytics

User Stories:

- As a user I would like to visualize the sentiment data from Twitter
- As a user I want to search various topics
- As a user I would want a Keyword search to see public perception
- As a developer I want to be able to aggregate the data from user searches to form conclusions from user input
- As a developer I want to create a live feed to see the primary source of the data
- As a user I want to easily navigate the interface
- As a user I want to know the reliability of a website/article
- As a user I want to see the public perception of a recently posted article
- As a user I want to be able to provide input on whether I agree with the reliability of a current article or now
- As a developer I want to be able to scrape text from various websites
